Research Interests

I work on applications of Artificial Intelligence for Human-Robot Interaction, specifically designing and building robotic systems that exhibit social intelligence, are easy for people to interact with, and can provide engaging and educational experiences.

Education

2013–2015	**S.M. Media Arts & Sciences**, *MIT Media Lab*, Cambridge, MA, USA. Advisor: Cynthia Breazeal. Thesis: "Developing Affect-Aware Robot Tutors."
2009–2013	**B.S. Computer Science**, *Yale University*, New Haven, CT, USA. Graduated with Distinction in the Major. Senior thesis advised by Brian Scassellati.

Research Experience

2013-2015	**Graduate Research Assistant, Personal Robots Group**, *MIT Media Lab*, Cambridge, MA. Developing interactive social robots and novel computational models to enable fluent social interaction and collaboration between humans and robots, particularly through the use of multi-modal, affective user data
Summer 2012	**Research Associate, Disney Research - Boston**, *Walt Disney Imagineering*, Boston, MA. Worked with Jonathan Yedidia on a novel sentiment analysis system for Walt Disney Imagineering. Our project, **"Making Sense of the Blogosphere: Semantic Analysis of Text Mined from the Web"** won the **Judges' Special Distinction Award for Methodology** in company-wide Business Intelligence and Data Analytics Competition
2010 - 2013	**Research Assistant, Yale Social Robotics Lab**, *Yale University*, New Haven, CT. Worked with Dan Leyzberg and Brian Scassellati to develop and evaluate robot tutors capable of personalizing to individual learning differences.

Industry Experience

2015-Present	**Robot Skills Engineer**, *Jibo, Inc.*, Boston, MA. Working with design and hardware teams to create end-user applications for a consumer home robot that delivers unforgettable experiences through advanced robotics and AI innovation.
Summer 2011	**Software Development Engineering Intern**, *Amazon, Inc.*, Seattle, WA. Built internal bug analysis tool and received return offer. Member of four-person team whose submission, an Android app called "SmileIKnow" was a finalist at the 2011 Amazon Mobile Security Hackathon
